

CONTOUR

WRIGHT

Driving a greener future.

History revisited

Wright has been leading the way in the transportation industry with innovation and unwavering commitment since 1946. Today, we are the No1, zero-emission bus manufacturer in the UK and the fastest growing in Europe. But back in the 1980s, the company began producing high-end luxury coaches that were ahead of their time in terms of design. They were named Contour and now Wright is entering back into the coach market with a new Contour diesel model. The new Contour is competitively priced, has a reduced lead time and is fully supported by our All Service One Network.

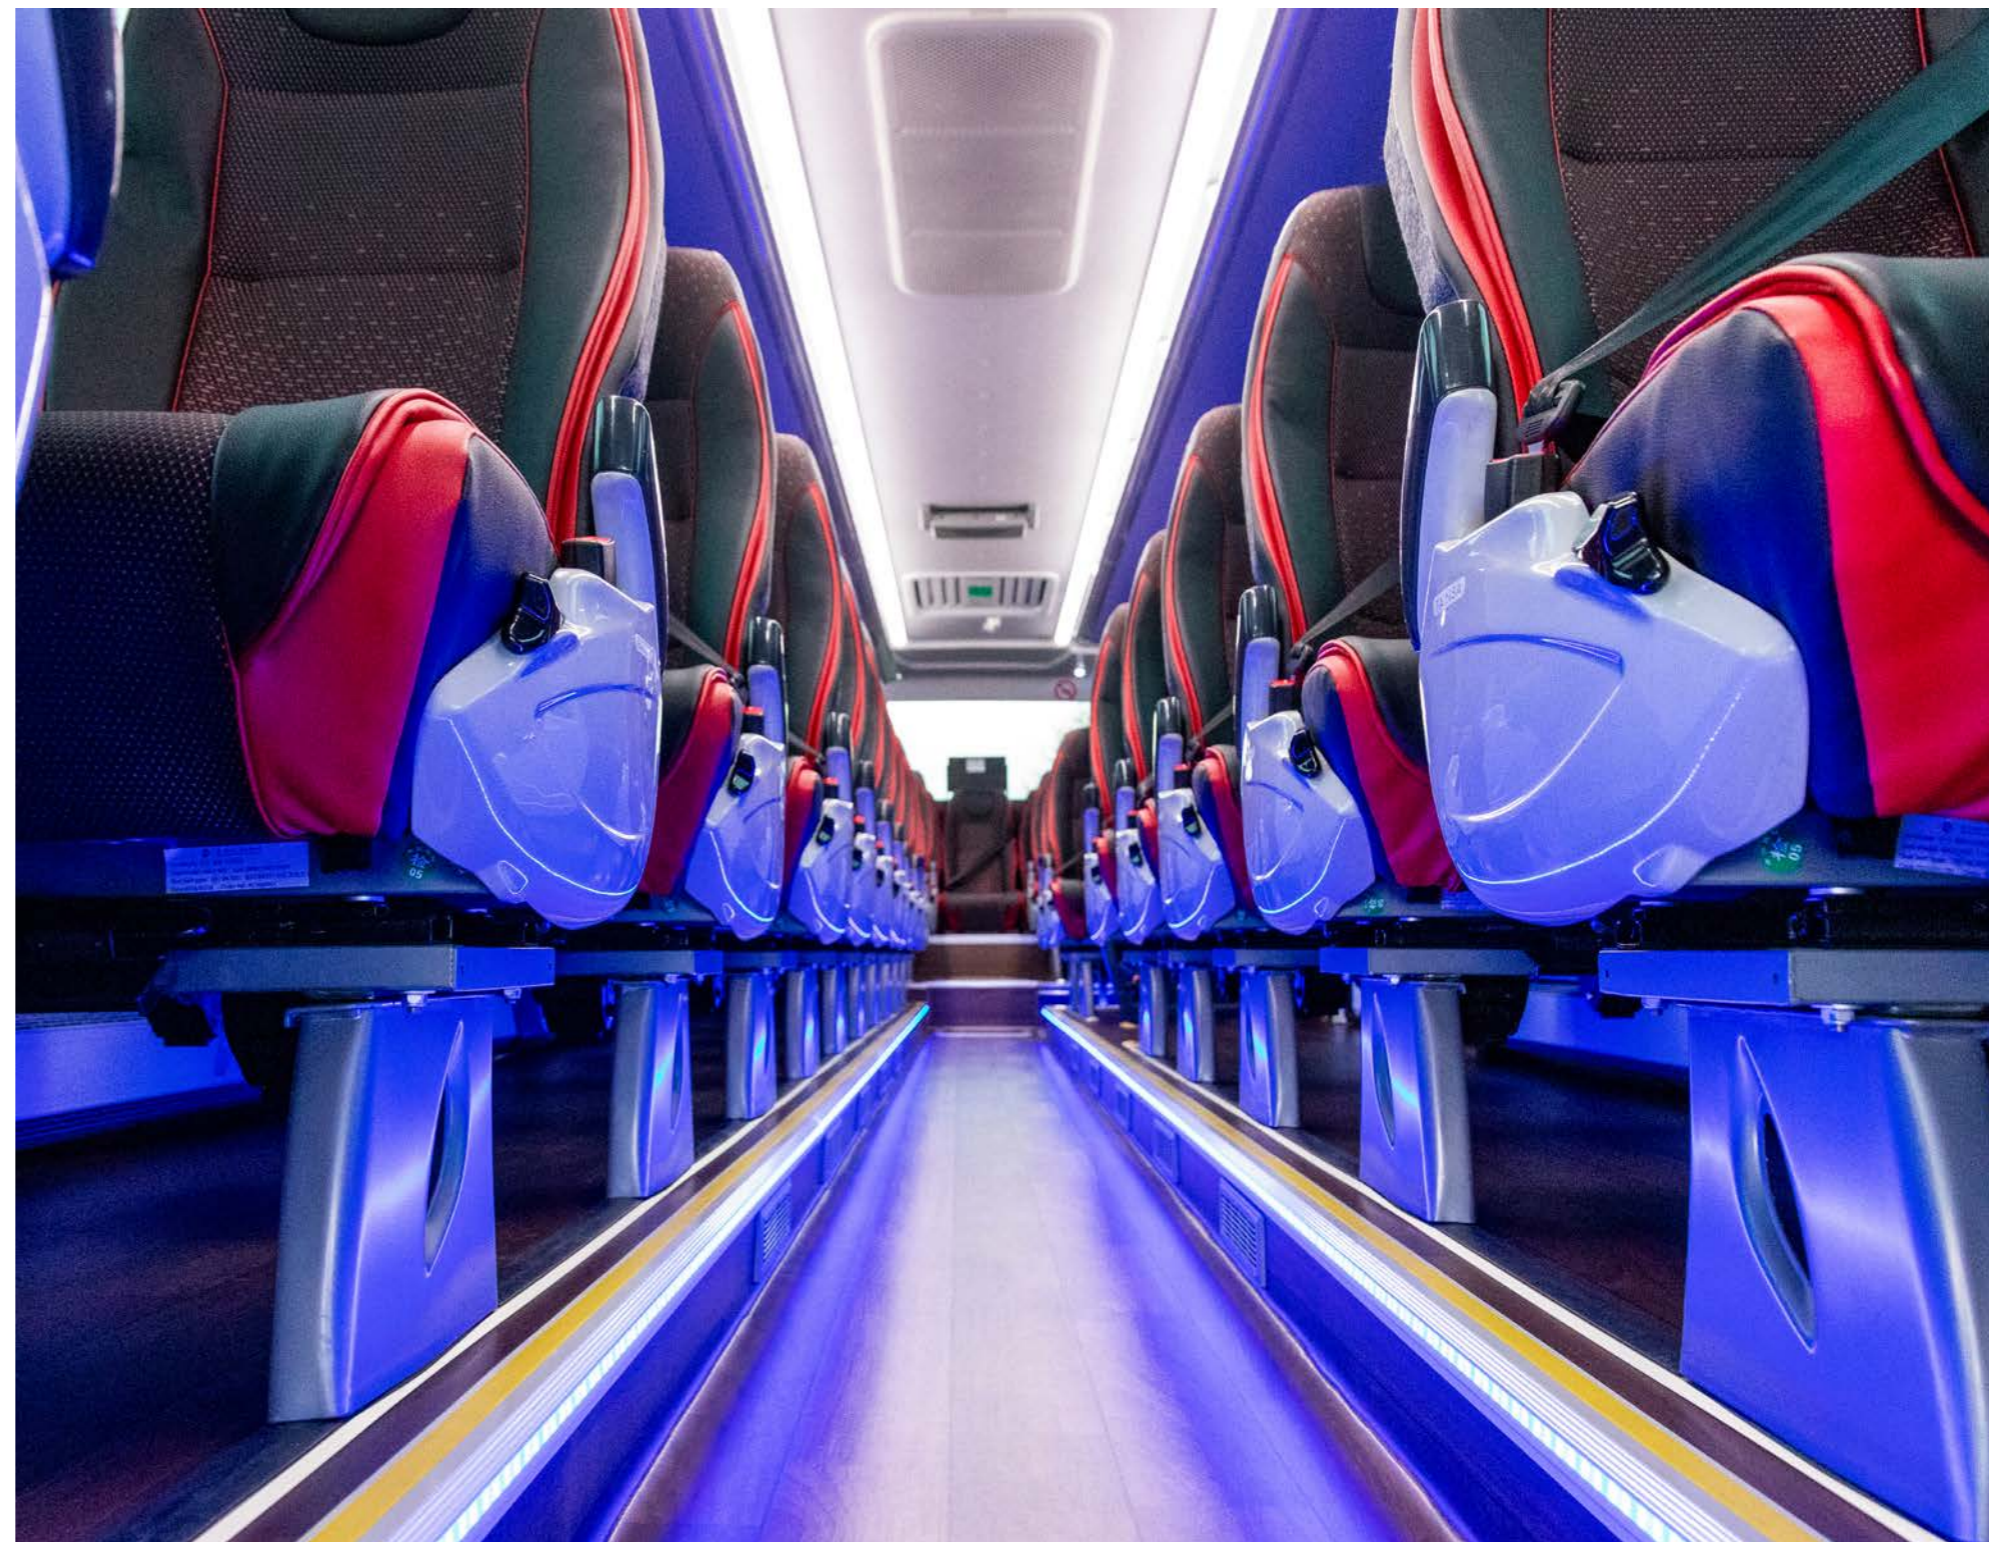

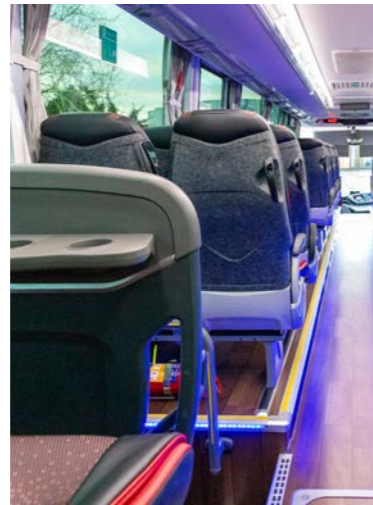

It also comes with a 2 year or 200,000km warranty.

Maximum interior space

Measuring 12,200mm x 2,550mm x 3,770mm, the Wright Contour is extremely spacious. It can fit up to 55 passengers in reclining passenger seats, plus a driver and tour guide seats.

Maximum passenger comfort

The Contour has a modern, stylish interior with a focus on greater passenger comfort, safety and convenience. There are USBs in every seat, which are all reclinable with adjustable arm rests. Each seat also has an optional footrest, magazine rack and folding table. Modern safety features include 3-point seat belts and 'buckle up' seat belt alerts.

Maximum driver comfort

Designed for maximum driver comfort, the Contour has a comfortable seat with armrests, easy to reach functions and a modern, ergonomic display with automatic foldable colour 15" LCD, plus a microphone for the driver and crew seat. For extra safety, it has a 3-point safety belt and electrical sunshade for the windscreen, while a full-screen front windshield adds style and greater visibility. For extra peace of mind, the Contour has a reversing camera as standard, and a camera at the rear door. It even has a large capacity, dash mounted refrigerator.

Maximum access

The coach exterior has been designed to maximise luggage space and has powered, parallel opening locker doors. For complete accessibility, the Contour meets the UK Public Service Vehicles Accessibility Regulations (PSVAR). The coach can be supplied as: PSVAR compliant, non-compliant and pre-prepped.

Maximum power

The Wright Contour diesel coach is fitted with a Cummins X11 Euro 6 engine, delivering an impressive 400Bhp. It also features a ZF automatic gearbox for maximum efficiency.

Telematics. We keep your buses running more efficiently and for longer.

The Wright Contour can be offered with our Uptime 365 telematics system as a cost option. AllServiceOne Uptime 365, does exactly as the name suggests. It keeps bus fleets at peak performance and offers a clearer understanding of their operation and availability

The AI-based system provides real-time predictive data analysis, and can alert when a bus needs preventive intervention, saving on maintenance costs.

AllServiceOne Uptime 365 Key Features:

- All Fleet, Age and Technology Compatible
- Predictive maintenance
- Realtime AI technology that learns for itself – 5,000 sensors monitor performance
- Reduce downtime and lower costs
- Reduced on road breakdowns
- Visual Fleet Management

Stay up and running for longer with our advanced telematic systems.

Expert after sales support. We're always there for you.

Our team are experienced in maintaining diesel, hydrogen electric and battery electric vehicles. Their work and the quality of our products have resulted in an Uptime of 98.6% on our BEV vehicles.

At Wrightbus, we're proud of our vehicles, but we're equally pleased with how **AllServiceOne** after-sales and personalised service is supporting our customers, after its introduction in 2021.

- Our optional on-board AI telematic system communicates events directly to our dedicated team of specialist engineers, who have hands-on expertise with the design and build of our vehicles
- Our Rapid Repair Centres in Ballymena, Coventry and Bicester. can conduct major body repairs and get coaches back on the road
- Our team is available 24/7, and customers can even log a fault on their mobile with our Technical Support App. The online parts portal and hotline can react immediately to customer needs, and over 95% of parts are delivered by the next morning
- Our teams of Master Technicians are embedded locally to support customers at their premises

Our team's commitment and expertise help keep your coaches running even smoother.

Superior spare parts that make us a part of your success.

Keeping your fleet on the road is integral to your business success and ensuring your satisfaction is integral to ours.

That's why we are committed to providing only the highest quality parts, as well as exceptional parts support.

Our parts aftermarket programme is designed to keep your bus reliable and efficient for its entire lifespan and our programme includes:

- All parts supplied are guaranteed for a minimum of 12 months
- Comprehensive stock of parts for immediate delivery tailored to our customer needs.
- Dedicated Technical Support email, helpline, and online & mobile friendly service portal
- Full vehicle refurbishment to extend vehicle life through our Rapid Repair Centre
- Guaranteed parts supply for all body or chassis products within 24 hours through a centralised parts distribution centre
- Parts assurance packages tailored to customer needs
- Repair and maintenance contracts tailored to your requirements, including supply and fitment of parts
- Wright offer full OEM technical support, parts and warranties on the Wright Contour from Ballymena UK.

Become a part of the Wrightbus family.
