

# NEWPOWER

NewPower is a pioneering force in the journey towards sustainable transportation. Located in our state-of-the-art factory in Bicester, Oxfordshire, NewPower is dedicated to accelerating the decarbonisation process by eliminating diesel powertrains from mid-life diesel buses for a carbon free 10 year new life, saving up to 70t of carbon per annum on the journeys it makes. Set up and owned by Wright, the only OEM offering a repowered service. Warranty backed by Wright.

**NewPower TCO 21% better than diesel.**

## NewPower Advantages

- Less than half the price of a new EV.
- Accelerating decarbonisation of the bus fleet and achieving decarbonisation targets.
- Repowering buses from diesel to electric reduces 70 tons of carbon per bus per annum.
- Extended 10-year life expectancy of the repowered bus.
- Qualifies for 22p/km the Bus Service Operators Grant.
- Improved air quality in the communities served.
- Turn around in 3 weeks.
- The first major bus OEM to offer this solution, Wright homologate, cover the vehicle with OEM warranties.
- Option to refurbish the bus: repaint, new upholstery, interior refurbishment.
- Diesel powertrain can be refurbished and returned to the depot as backup spare parts for your remaining diesel fleet.
